

WP Series—Deck Application

Features ♦ Advantages ♦ Benefits

<i>Feature</i>	<i>Advantage</i>	<i>Benefit</i>
Tactile sound	Low, powerful bass.	Eliminates large subwoofers.
Single-point mount	Mounts under deck.	Speaker is unseen. House and soffits are free from speakers and wire look.
Single-point mount	Easy installation even with uneven surfaces.	Speeds installation.
Tactile sound	Actuates deck as speaker.	More efficient, even sound transfer (than traditional speakers).
Tactile sound makes sound appear louder than actual airborne sound.	Reduces sound to neighbors or other areas.	Happy neighbors.
Weatherproof	For long life in harsh environments.	No service or replacement purchase issues.
Tactile sound and vibration	Vasil Dialation.	Better health and blood flow.
8 X 3 inch size	Small and unobtrusive, even under ground-level decks.	Looks good and fits in tight spaces.
Actuates whole deck	No hot spots.	Even sound everywhere. No aiming, like conventional speakers.
Tactile sound make things louder	For entertaining and parties, high-quality sound can be achieved without problems.	Easier to use for quieter and loud uses.
Under-deck installation	Keeps everything below deck, invisible to the eye.	Looks. Easier to clean house and deck.
