UNDERWATER LOUDSPEAKERS

AQ339 Underwater Swimming Pool Speaker

Aquasonic
UNDERWATER LOUDSPEAKERS

Benefits:

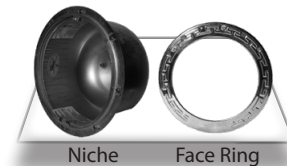

- Adds enjoyment to lap swimming
- Adds to your guests' enjoyment when you host pool parties and outdoor events
- Allows you to listen to your favorite music while you swim, all without sacrificing sound quality
- Entertainment for both children and adults

Special Features:

- World's only full-frequency, full-fidelity underwater speaker that plays the entire range of music
- Delivers crystal-clear music below the water's surface
- Works in saltwater and freshwater pools
- No minimum depth requirements for mounting in the pool
- One speaker covers approximately 400 ft² (36m²) of pool

Applications:

- Can be mounted inside a large light niche with a face ring kit (niche/face ring kit sold separately)
- Attach a tether to use as a drop-in speaker

The AQ339's Accomplishments:

- Used in premier resorts and hotels worldwide
- Speaker of choice for United States Synchronized Swimming events
- Used in numerous recreation and lap pools around the globe
- Key components in Las Vegas water shows
- Manufactured since 1994
