TST429 Platinum Transducer

The TST429 Platinum transducer is the most powerful transducer available from Clark Synthesis. With a focus on providing the ultimate in performance and output, Clark Synthesis designed the TST429 to meet the demands found in many audio/video applications such as high-end home theater furniture, theater risers and platforms, custom floors, and ProSound equipment.

An amplifier is required in order to operate the TST429 Platinum. Clark Synthesis recommends using an amplifier that is stable at 4 ohms that can deliver 125-150 watts @ 4 ohms (per transducer).

TST429 Platinum	
Continuous Power Handling	135 watts
Impedance	4 ohms
Overload Protection	Polyswitch
Frequency Response	5Hz to 17kHz
Electrical Connection	3 ft.- 16 gauge, 2 wire
Dimensions	8 in. diam. x 2.25 in. high
